What to fix

ID	Suggested fix	Owner	Type	Path
LE-04	Identify duplicate clusters; keep earliest event; integration fix for the duplication source (usually retry without idempotency); Manago event deletion is limited - where removal is impossible, mark duplicates in detail and exclude in Klints canonical layer.	Klints (automated)	Automated writeback	/fix?issue=LE-04
CC-03	Provenance report per cohort; where Shopify holds the evidence, backfill source metadata; unevidenceable cohort ? re-permission campaign proposal, not silent continued sending.	Data lead	Automated writeback (approved) + Manual (guided)	/fix?issue=CC-03
CI-13	Cluster state changes by date to locate the incident (bad import, blacklist event); remediation plan is investigative, not automated.	Data lead	Manual (guided)	/fix?issue=CI-13
ME-08	Baseline coverage report per candidate workflow; where baseline is weak, blueprint impact stated as band with explicit confidence, never a point estimate.	Klints (automated)	Configuration	/fix?issue=ME-08
ME-09	Posture report; if damaged: warm-up and hygiene plan precedes any new-volume blueprint; sunset segment for chronic non-engagers.	Data lead	Manual (guided)	/fix?issue=ME-09
